SUMMARY

Computer Science student at Minya National University with a strong academic foundation in software development and hands-on experience in mobile and full-stack application development. Proficient in Flutter, Dart, C#, .NET, Python, SQL, Firebase, and REST APIs, with practical experience in developing cross-platform applications and database-driven systems. Experienced in applying software engineering principles, object-oriented programming, database design, and clean architecture to academic and practical projects. Seeking an internship or entry-level opportunity to contribute technical skills while further developing professional experience in software development.

EDUCATION

Minya National University **2024 – Present**

B.Sc. Student in Artificial Intelligence ,

Computer Science and Software Engineering

Minya, Egypt

- Expected Graduation: September 2028
- Relevant Coursework: Object-Oriented Programming, Data Structures, Algorithms, Database Systems, Software Engineering

PROJECTS

Noor – Islamic Mobile Application | Flutter, Dart, Firebase **2026**

- Developed a cross-platform mobile application using Flutter with a modern and responsive user interface.
- Implemented Arabic and English localization with persistent language preferences.
- Used Flutter Riverpod for state management and GoRouter for application navigation.
- Integrated Firebase services and REST APIs as part of the application development process.
- Implemented features including Quran reading, prayer information, Dhikr, profile, and application settings.
- Applied Feature-First Clean Architecture to organize and maintain the project structure.

Nafi3 – Smart Donation Application | Full-Stack Development, Flutter **2026**

- Developed a full-stack mobile application that connects donors with verified charities and communities in need.
- Built the mobile application using Flutter with responsive and user-friendly interfaces.
- Implemented backend services, database integration, authentication, and API communication to support the application.
- Developed features including donation tracking, pickup scheduling, need mapping, charity verification, and donation matching.
- Designed a smart donation matching concept based on location, urgency, and donation category.
- Collaborated on system architecture, user stories, sprint planning, and software engineering practices.

LogiTrack – Warehouse Management System | Flutter, Node.js, PostgreSQL **2026**

- Developed a warehouse management system featuring a cross-platform Flutter mobile application and a robust backend.
- Built the backend using Node.js and Express, integrated with Prisma ORM and PostgreSQL for efficient database management.
- Configured database schemas, API authentication endpoints, and core business logic for inventory and logistics tracking.
- Designed and built the Flutter frontend widgets to seamlessly communicate with the backend services.
- Deployed web components and application views using GitHub Pages.

TECHNICAL SKILLS

Programming Languages: C#, C++, Python, Dart, JavaScript, SQL

Mobile Development: Flutter, Dart, Firebase, REST APIs, GoRouter

Web Development: HTML, CSS, JavaScript, MySQL

Backend & Database: .NET, SQL Server, Firebase, MySQL

Design & Development Tools: Figma, Stitch, Git, GitHub, Visual Studio, VS Code, Android Studio

Concepts: OOP, Data Structures, Algorithms, Database Systems,

Soft Skills: Problem Solving, Critical Thinking, Teamwork, Communication, Collaboration, Adaptability, Time Management, Self-Learning, Fast Learning, Attention to Detail, Decision Making, Organization, Leadership, Creativity, and Work Under Pressure

CERTIFICATIONS & TRAINING

Full-Stack .NET Development | DEPI **6 Months**

Mobile Application Development | National Telecommunication Institute (NTI) **2 Months**

Full-Stack Web Development using Python | Information Technology Institute (ITI) **2 Months**

Web Development Fundamentals | Information Technology Institute (ITI) **60 Hours**

Web Development Fundamentals Camp | SAIT **72 Hours**

Learn HTML & CSS | Mahara-Tech **3 Hours**

JavaScript | Mahara-Tech **3 Hours**

Building Web Applications using PHP & MySQL | Mahara-Tech **3 Hours**

Database Fundamentals | Mahara-Tech **3 Hours**

LANGUAGES

- **Arabic:** Native
- **English:** Good
